**COMMUNITY NURSERY Inc**

1 Pademelon Lane, Kuranda 4881

Phone: 4093 8834

Email: [kurandaconservation@hotmail.com](mailto:kurandaconservation@hotmail.com) Website: [www.kurandaconservation.org](http://www.kurandaconservation.org)

The KCons community nursery is nearly always open at 1 Pademelon Lane (cnr Fallon Rd and Kennedy Hwy).

*So passionate are we about making sure there are no obstacles to you getting and planting trees – just one tree – WE WILL GIVE YOU A TREE if you can commit to planting it. Yes, we will give you, no cost, any tree you select in the nursery. That's our commitment. All that's needed now is your commitment.*

Two sturdy trailers ready to go

We enjoyed the company of these fabulous youngsters from America at a private property tree planting in Myola in the past week. They got stuck into the job with great enthusiasm and cooperation and 70 trees were planted within an hour. If you have space for some rich rainforest trees, we'd love to do the job for you.

## TREES FOR LIFE (all life)

It is now pretty clear to us all that trees are a vital element to climate stability. Trees in our gardens provide food and habitat for animals and insects. Trees in forests control the movement of moisture, air currents and temperature on a global scale.

With the broad scale clearing of native trees for massive monocultures of non-native vegetation, mining, cities and towns, we've now reached the point where **EVERY TREE COUNTS.**

If we can assist you in planting just one native tree in your garden or more than one on your property then we will be doing the job we set for ourselves.

**PLANT JUST 1 TREE**

## IT'S ALL CONNECTED.....

Our push to get more trees in the ground is connected to the Kuranda Regional Planning Group's push to find landholders interested in protecting their properties as Nature Refuges and adding to the bank of properties that form the massive wildlife corridors through the Wet Tropics World Heritage Area and Kuranda.

It's worth remembering that Kuranda sits at the very narrowest part of the WTWHA making the Kuranda region of critical importance in preserving connectivity of rainforest habitat. Cassowaries, of course, being the icon.

We need to work together on this, so please take a leap of faith, make that phone call or email us to get the ball rolling.

**You are at the centre of this and you remain the leader. We can't move forward without you.**

## GARDENING AUSTRALIA

We were impatiently waiting for the September showing of our nursery and our cassowary adventures on the well loved Gardening Australia program, only to find it's been put back to October. Keeping the best till last?!

**IF YOU SPOT A CASSOWARY ON YOUR PROPERTY, PLEASE GIVE US A CALL.**
